POR LA industria NACIONAL

II

Los contratistas de dulce hechos por la administración pasada informaron que dieron lugar a la formación de un trist dulce y ahora la fábrica tiene que comprar un dulce que no necesita y exportar gran parte de él, para diende dinero.

La industria azucarera ha llegado al máximo de explotación del pueblo de Costa Rica; está vendiendo el azúcar más caro de lo que cuesta en Inglaterra, los Estados Unidos ó cualquier otra parte del globo, pero hay que colocar las nubes, y la única forma posible de lograrlo es la de que por uno ó otro medio, si pueblito beba mucho guaro y nada más que guaro.

Es posible que el señor Peralta no haya pensado en las consecuencias de su proyecto; es posible que algunos le hayan sugerido la idea de la posibilidad de ese impuesto; cuando llegue á discutirse en la Cámara saldremos de dudas, porque veremos quien lo apoya y sabremos por qué lo apoya.

La utilidad que el impuesto dejaría para la construcción de caminos hemos dicho que sería ilusión y vamos á probarlo. Todo el que conozca algo de la gran industria sabe que la utilidad es muy infima; que sólo á fuerza de producir y vender mucho y sumando beneficios insignificantes como se llega á una utilidad total apreciable. Esas razones explican por qué algunas industrias, como la de fosfatos, por ejemplo, han fracasado en Costa Rica; la utilidad es muy pequeña y el consumo insuficiente para que esa utilidad llegue á pagar el interés del capital empleado.

Pues bien, el señor Diputado Peralta propone un impuesto, que, aunque sin datos precisos, nos atrevemos á afirmar es muy superior á la utilidad actual de la fabricación.

Véanse los altos derechos de importación, que se pagan por la manta, la cabeda y el lúpulo, consideres el sin fin de intermedias que se benefició con la venta y se nos dará la razón.

Será el fabricante quien pague el impuesto? Será el consumidor?

El fabricante no puede pagar porque nadie trabaja para perder dinero y la utilidad no lo pagará tampoco porque, ese consumidor en el pueblo, las clases acomodadas es sabido que no beben cerveza nacional, por sobrasismo, puesto que si en sabor pueden aventajarla algunas de las grandes marcas alemanas, en cambio lleva la inmensa ventaja de no estar encabezada con alcoholos industriales ni preservada con sales.

Sea de ello lo que quiera, es lo cierto que sólo el pueblo consume la cerveza nacional y que si se la encarecen, volverá fatalmente al grano, el artesano ó campesino que solo dispone de cinco ó diez centavos, toma hoy con ellos una cerveza, que es alcohólica, es cierto, pero si es al mismo tiempo nutritiva; si le cobran, quince ó más centavos, tomará aguardiente.

Hay otra consideración digna de tomarse en cuenta; si se confi-

púa legislando á tontos y á locos, como dice un Honorable Diputado que escribimos los échicos de la prensa, llegaría el día en que nadie se atreva á invertir un centavo en empresas industriales en Costa Rica; ayer fué un proyecto de contrato que viene á solicitar por tierra el comercio de ferretería, hoy un proyecto de impuesto que mata una industria en la que se han empleado grandes capitales.

Sin estabilidad en las leyes fiscales, sin respecto a los intereses creados, es imposible pretender que venga capital extranjero a establecerse entre nosotros.

Y no solamente no vendrá, sino que emigrará el capital existente.

El Congreso

El Honorable Congreso ha vuelto sobre sus pasos, abriendo de nuevo sus puertas al público.

Los «muchachos» de la prensa con su gritorio infernal, han conseguido echar por tierra la draconiana moción del señor Figueras.

De la sesión del lunes solo merece especial mención una moción del Diputado señor Diaz para que se eleve á Ct. 1.500 el sueldo del señor Presidente de la República y á Ct. 750 el de los Secretarios de Estado.

Una manera como cualquier otra de conseguir la inmortalidad.

Cuando se trata de rebajar el sueldo, por economía, á empleados que, como los choferes de la Aduana de Limón están recargados de responsabilidad y de trabajo, repugna al sentido moral una moción como la del señor Diaz.

El Gobierno, en Costa Rica, como en casi todos los países de la América Latina, es personal; la responsabilidad moral de una administración se atribuye por eso á su Jefe, al Presidente.

Los Secretarios del Estado, son, salvo muy pocas y honorables excepciones, más que Oficiales Mayores de los Departamentos, una especie de escribientes distinguídos; para desempeñar esas funciones están de sobra remunerados.

En cuanto al señor Presidente, es sabido que ese cargo ha sido y será oneroso siempre que esté en manos honradas; sin embargo, se lucha encarnizadamente y se gasta dinero por conseguirlo, porque se considera que es más honorífico todavía que oneroso, y mientras todavia sea así, no se pierde.

Los anteriores noticias han causado alguna alarma entre las potencias, a pesar de los Tratados de arbitraje que entre casi todas se han terminado y á los que evidentemente conceden tanta eficiencia como la que aquí concedemos á la Corte de Cartago y á las Convenciones de Washington.

Todos los productos de la cervecería La VICTORIA se hallan de venta en "The Efervescent Water Co." uno-depósito en Limón

No creemos tampoco que el distinguido señor Jiménez aceptase un solo centavo de aumento.

Dice Schopenhauer, que en tanto que por nuestros trabajos intelectuales, aunque se trate de las más perfectas obras maestras del mundo, recibimos de buen grado una recompensa si nos la ofrecen, cuando acabamos de ejecutar algún acto de un alto valor moral, rechazamos toda clase de remuneración, pues sabemos que esa acto tiene un valor metafísico, y al ser pagado, lo perdería.

Para nosotros, tiene un alto valor moral el que un hombre honrado como el señor Jiménez, gaste dinero en alcanzar un puesto en que el provecho es negativo y la gloria muy problemática.

(Por qué el nombre de Biombo?) Castro dice que es de la Gran Familia de los Túneles que la VICTORIA se ha hecho tan popular y famosa por sus inmejorables clases de cerveza Pilsener y Extra y los inmejorables refrescos que ellos fabrican.

La escuadra DEL JAPÓN

Los astilleros particulares del Japón se han habilitado para construir grandes buques de guerra en iguales ó superiores condiciones que los astilleros de Europa ó los Estados Unidos.

Los astilleros de Mitsu Bishi y Kawakari, han recibido órdenes para construir cada uno de ellos un crucero acorazado de 27.000 toneladas, el de Yokosuka otro crucero, y el de Kure un acorazado de combate.

Por ahora, la construcción de buques cuesta más cara en el Japón que en Europa, pero los Japoneses hacen el sacrificio con tal de no depender de nadie y que se conocan sus buques.

Para que se comprenda el immense desarrollo que está tomando la marina de guerra Nipona, damos á continuación la lista de los buques que actualmente se hallan en construcción.

	Toneladas
Kure Satsu acorazado.....	20.000
Kure (acorazado).....	18.000
Yokosuka Wakachi (acorazado).....	20.800
Yokosuka (crucero).....	25.800
Maizuru Umitake destruyedor.....	1.150
Kure destruyedor.....	800
Kobe (crucero).....	26.800
Sasebo Chikuma (crucero).....	4.950
Sasebo Gion (crucero).....	250
Nagasaki Yamaoka.....	1.150
Nagasaki Yahagi (crucero).....	4.950
Nagasaki (crucero).....	26.800
England (crucero).....	26.800

Total buques 15 Tona. 155.000

Como se vé, el Japón está construyendo cruceros de un tonelaje superior á los acorazados de combate y muy superior á los cruceros de cualquier armada mundial.

El objeto apparente no puede ser otro que el poder transportar con la debida seguridad y rapidez un cuerpo de ejército en unos cuantos buques, que siendo como son, protegidos, pueden montar artillería gruesa y ser tan eficaces para la lucha como para el transporte.

Las anteriores noticias han causado alguna alarma entre las potencias, a pesar de los Tratados de arbitraje que entre casi todas se han terminado y á los que evidentemente conceden tanta eficiencia como la que aquí concedemos á la Corte de Cartago y á las Convenciones de Washington.

Todos los productos de la cervecería La VICTORIA se hallan de venta en "The Efervescent Water Co." uno-depósito en Limón

Los últimos derribamientos en Las Mesas

Los últimos derribamientos en Las Mesas, han sido de gran extensión y la Compañía los ha removido y limpiado la linea sin interrumpir el servicio, restableciéndolo éste en su normalidad acostumbrada en 48 horas.

Por ello merece un aplauso.

Mejora de razas

Ayer llegaron en el Zenta 16 vacas frías de Jersey, 26 aves, 3 patos y 2 cerdos.

En Bechertown han sido sesionados los dueños de la finca Okrengro, Herr Von Frankenberg, comisionado alemán del distrito, dos sargentos blancos, cuatro policías negros y treinta arrieros.

Según los nativos, los alemanes se hallaban en territorio inglés, lo que se explica por no estar claramente definida la frontera.

Por ello merece un aplauso.

Exceso de producción

En Jamaica hay una existencia de ron considerable y temen no tener donde almacenar la futura producción.

En septiembre de 1910 decreció en más de 300.000 galones y este año ha sido mayor todavía el descenso.

Buenas ocasiones para comprar ron.

JUAN KNOHR HIJOS

HARINA

Nuestras marcas «Aguila & Cisnes», en calidad igual á «Gold Medal» y «Gallito», respectivamente.

El contrabando

de chinos en Panamá

Lack Tag, un chino residente en Colón asesinó á su compatriota Manuel Ross, por haberle cobrado 900 dollars en lugar de 450 convenidos por la introducción clandestina de 2 chinos procedentes de Jamaica.

Un negocio ese, es pingüe en todas partes, porque tiene sus querellas.

Así hay que vigilar un poco la playa de Puerto, á donde no son bañistas todos los que llegan.

IA quién se le debe el tomar hoy buena cervaza? á Romero y Castro Hnos dueños de la cervecería La Victoria.

* * * * *

Ha salido de Washington un corriente del gabinete que va á Roma a recuperar la firma del Embajador francés Mr. Julesse en el tratado general de arbitraje entre los Estados Unidos y Francia. Se están terminando idénticos tratados con Alemania, Italia y Dinamarca.

Corveras Pilsener y Extra de Romeo y Castro Hnos son por su calidad y pureza las mejores fabricadas en el país.

THE TIMES

Port Limon, Costa Rica (G. A.)

THE VALUE OF SUBMARINES.

Considerable discussion and comment have been caused by the operations of torpedo-boat destroyers and submarines during the recent naval maneuvers held in Long Island Sound and elsewhere in the vicinity of New York. The fleet of battleships and cruisers, which had on board, in addition to their regular crews, the naval militia organizations of half a dozen Northern States, engaged in sham attacks on the strategic points around New York and were attacked in their turn by a number of ships and torpedo craft, representing the defense fleet. While many claims are made on both sides of success in the maneuvers, the most important development seems to be the apparent successful attack of the torpedo craft and submarines on the armored ships. Despite the powerful searchlights of the ships, torpedo-boat destroyers were frequently able to approach within a thousand yards before being discovered, a distance that would afford a very effective range for torpedoes. A number of the submarines were able to come within 500 yards of the battleships without being discovered and some of them actually dived beneath the keels of the ships, coming up on the other side.

While the apparent results would seem to establish the value of torpedo craft and submarines, it should not be forgotten that there is a vast difference between mimic warfare and actual hostilities. A fleet of battleships maneuvering off a hostile port or coast would hardly lie quietly at anchor and invite attack by submarines. It is easy to understand how deadly a submarine might become to an anchored ship, but as against a rapidly moving vessel the submarine would be at an enormous disadvantage, the big ship being an infinitely greater danger to the submarines than the latter could possibly be to her.

Despite the improvements that have been made to submarines, none of these craft can maintain a very high speed beneath the surface of the water, certainly not a speed that can compare in any way with the speed of the average battleship. The chances, therefore, of a submarine delivering a telling attack on a rapidly moving warship are small. Against anchored vessels or ships merely drifting about on blockade duty submarines can undoubtedly be used to advantage, although it is more than probable that the idea of their destructiveness is more imaginary than real.

While the United States is steadily adding to its fleet of submarines, the European countries are doing a great deal more along the line and are not only building many of this type of craft, but are constructing them much larger in dimensions than the type in use in the American fleet. That the little craft will prove useful in coast and port defense seems to be generally admitted.

Recent Slides.

GOOD WORK DONE

Referring to the slides at Las Masas on Monday it is stated that the block extended several chains in length, much longer than other slides, and although this was so it was cleared up in quick time. A large gang of mixed laborers was carried on the spot immediately after the report, and with efficient superintendence what otherwise would have been a block for some days proved a blessing to those traveling between here and San José.

Indeed the Railroad Company is to be congratulated for the manner they do things during trying times. What is most striking with this company is the effort they display regardless of the enormous expenditure that is generally incumbent on them so as to cater to the want and necessity of the travelling public. No one should grudge this company for what they earn, because it is with no sizeable amount of grit and perseverance avoid weekly mishaps that they get what is put into their coffers.

Special mention should be made of Mr. Crowley, an employee of the company, who went to Santiago to get foodstuff for the large gang of men that was labouring to clear the slides. This gentleman regardless of personal inconvenience did all in his power to make the laborers comfortable.

There was also another slide at Las Lomas the day after that at Las Masas, but not as great. The men again showed themselves to great advantage, thus proving without a shadow of doubt what work can be achieved under good management.

Bright Laughter in the House.

"A good laugh," says Thackeray, "is sunshine in the house." And how true it is! The day may be dull and wet and miserable but weather is forgotten where the heart is glad. There may be worries and troubles, but they can be more easily faced if the faculty to laugh is there. In the greatest tragedies there is some measure of relief and in the everyday happenings of life there is always a comic element. The trouble is with some persons that they can never see any relief, never spy the faintest silver lining to the black cloud. With such people life is an uninterrupted hardship, broken only by depths of woe. They only live because they have to live, but are absolutely destitute of any "jade de vivre." Such lives are not worth living. If we cannot get and give some pleasure out of living we might as well be dead. But how, some may ask, are we to cultivate the faculty of enjoying? Like most things it starts in youth. If fathers and mothers encouraged their children to be happy and merry instead of too often repressing them it would be better. Instead of hushing the cheery laughter they should join with them; instead of teaching them that life is dull and cheerless they should instill into their receptive minds that life can be made very happy, very cheerful.

This proposition met general favor with the members of the executive committee, and the body will recommend to the board of directors that such banana-weighing and inspecting bureaus be added to the board's activities.

The Board of Trade has a grain bureau, rice committee, hay in-

specting department, and it is ar-

short. Too often the religious person is a very solemn person; too often the religious person suppresses and finally kills all joy in living. If "Christianity" means happiness—joy in this world and faith in the world to come—One of our city clergy with a natural gift of humor recently made some of his congregation laugh at the droll manner in which he put something. This was frowned upon by some of the congregation. But why? Surely laughter is acceptable to the Maker of all things as tears. A good text for all families is this saying of Thackeray's, a prince of humor himself: "Laughter is sunshine in the house."

Indeed the army authorities take a census of the number of horses, and the figures for 1911 show 72,488 in Paris, compared with 96,698 in 1901. This means that in ten years, the number of horses has decreased 24,210, or almost exactly a quarter. The military authorities are somewhat perturbed over this fact. It is true that for transport of war material and provisions automobile traction saves the use of many horses, but there remain the needs of the cavalry and artillery. The old standby for trained horses, the omnibus companies, will soon be of no assistance, as automobiles are rapidly supplanting horse drawn stages.

gued that as bananas constitute one of the port's most important trades, the banana bureau should materialize.

The committee also adopted the plan of Congressman Wickliffe to bring the Panama Canal machinery to Louisiana when the work on the isthmus is completed to dig canals for draining purposes. ("The Picayune.")

Current Items.

Sixteen fine Jersey milch cows came on the "Zent" yesterday consigned to Felipe Alvarado & Co., also 26 fowls, 3 ducks and 2 hogs.

We learn with regret that Mr. Aikman, assistant to Captain Owen, has been confined to bed for the last few days. We trust he will not be joining early the great majority.

News has just reached here that Mr. Charles Grant, import clerk on the metallic pier, who left here a few weeks ago for Jamaica for the benefit of his health is recuperating and expects returning three weeks hence.

Precautions Taken at Port Antonio, Jamaica.

Port Antonio.—Since the 23rd of July all steamers arriving at this port from New York have been subjected to strict observation by the Health Officer, in consequence of the outbreak of cholera at the American port. Each vessel on arrival is placed in quarantine for a short period and all the water tanks are pumped dry.

Uniform Time Throughout W.I.

The following notice has been issued by the Government of Barbados:

In order to adopt a uniform time throughout the British West Indies and British Guiana, it has been decided to adopt Standard Time exactly 4 hours later than Greenwich Mean Time, Barbados, from and after the 1st July next. Notice is hereby given that at midnight of 30th June—1st July all clocks will be put back one-and-a-half minutes.

Banana Inspection.

BOARD OF TRADE WOULD
CREATE A SHIPPING
BUREAU.

A banana-weighing and inspecting bureau, whose duty it will be to generally facilitate and improve the shipment of bananas out of this port, is planned by the Board of Trade's executive committee. At a meeting of the body recently the matter was brought up and discussed at length.

It was pointed out that since the coming of the United Fruit Company to this port, New Orleans had become the greatest banana port in the world. The company developed the business from little more than nothing to its present time, and from time to time improved its service until New Orleans became the leading banana port of America.

The proposition met general favor with the members of the executive committee, and the body will recommend to the board of directors that such banana-weighing and inspecting bureaus be added to the board's activities.

The Board of Trade has a grain

bureau, rice committee, hay in-

The old standby for trained horses, the omnibus companies, will soon be of no assistance, as automobiles are rapidly supplanting horse drawn stages.

Prison for Duellist.

Berlin.—Baron Oswald von Richtofen, who killed Wilhelm von Gaffron in a duel on May 10 last, has been sentenced to two years' confinement in a fortress.

A military court found that there were extenuating circumstances.

The father of the Baron was at one time Imperial Secretary for Foreign Affairs. The quarrel that led to the duel was over money matters. Both were officers. Von Gaffron being on the retired list. They fought with pistols just after dawn in a forest near Berlin.

Von Gaffron had considerable fame as a sporting man and a gambler.

All Sorts.

Fruitless Struggle: "I understand that, after waiting twenty years, she married a struggling man? Yes, poor chip; he struggled the best he knew how, but she landed him."

She—I should like that lovely pearl necklace! Look what beauties are here, Mr. —It's better not to have such large pearls, my dear. Peep's always think they are fake."

No Horses.

Paris has been described as a paradise for women, a purgatory for men and a hell for horses. The number of horses steadily decreases under motor competition and the horses that remain have to thank the automobile as well as the efforts of various societies for the better treatment they receive, for to survive in these days they must be fit.
